## Fish & Game Assn. Appoints Delegates

A meeting of the executive of the Fish and Game Association was held Friday evening for the purpose of appointing delegates to the annual convention of the Alberta Fish and Game Association to be held at High River on October 6, and the discussion of questions to be brought before the convention.

It was decided that in view of the fact that many female sheep, moose and deer were shot and left in the woods, the association advocates that all female game shot should be brought out and reported, and that the person shooting same should be prohibited from shooting any other big game during that season.

The delegates were instructed to advocate that the special license, allowing the shooting of deer or moose in the forests north of the Red Deer river, be reinstated.

The question of license fees was discussed and it was the consensus of the meeting that the fees were too high. It was decided to ask that the license fees for fishing, small game and big game be each reduced to \$1.00.

The following delegates were appointed to attend the convention: Messrs C. H. Ashhead, J. A. McGhee and J. E. Gooder.

The fish committee reported that 5,000 Loch Leaven trout fry had been placed in Bear Creek, tributary of the Fallen Timber, this spring, and that when last seen were doing very well. The planting of Loch Leaven trout in the creek during the last three years was now showing results and several had been caught during the season. Loch Leaven trout measuring 19 inches had been caught in the Fallen Timber.

## Pool Makes Payment To the Government

The sum of \$153,425 has been forwarded to the Alberta Government by the Alberta Wheat Pool, this being the annual instalment of principal on the loan due this month on account of the 1929 Pool overpayment.

The overpayment was guaranteed by the Provincial Government, and this is the third year this payment has been made promptly by the Alberta Wheat Pool.

## School Track-Meet Crossfield, Oct. 5

The annual school track-meet will be held at Crossfield on Friday of next week, October 5, when six towns will be represented, viz.: Crossfield, Bowden, Olds, Didsbury, Carstairs, and Crossfield.

This event has always brought out keenest competition between these schools, and from indications in the way of training at the various schools, this year is likely to bring out as large, if not larger, a number of entries of athletes as in former years.

The pupils of the local school are turning out well for training, and the teachers are showing a great interest and are endeavoring to have Didsbury School represented in each event.

## Alterations to Old Bank Building

Extensive alterations are being made to the Bank of Montreal building which was recently purchased by Mr. H. E. Friesen, grain buyer for the U.G.G.

The building is being made suitable for mercantile purposes and the front portion of the building is being made into a ladies wear shop which will be conducted by Mrs. Friesen.

The rear of the building will be occupied by Mr. J. J. Goertz who will operate a grocery store. Mr. Goertz came here from Herbert, Sask., where he had considerable experience in the grocery business.

## C.P.R. Changes Policy.

Change in conditions under which the railways will sell 30 day round-trip tickets, will, in future, allow stopovers on route. Previously, a passenger buying a ticket with a 30 day limit, for example, to Winnipeg, was required to use the ticket for continuous passage to and from Winnipeg only. After October 1, a similar ticket, without further cost, will permit the passenger to stop at any point, going or returning, between the starting point and destination, within limit.

## Obituaries.

Mrs. WALTER DAWN.

The death of Mrs. Walter Dawn, of Ghost Pine Creek, took place at the Calgary General Hospital on Sunday afternoon, September 21, after about two months' illness. Mrs. Dawn was well known in Didsbury, having spent most of her life in this district.

Anna Heleena Mueller was born in Hespeler, Ont. in 1896. She came to Didsbury with her parents in 1901, living with them on their farm 2 miles northwest of town.

She was educated at the Didsbury schools, and excepting for about 18 months when she resided in Oregon and California, she lived in Didsbury until her marriage with Mr. Walter Dawn in June, 1932, after which she resided at Ghost Pine Creek.

Left to mourn her loss are: her husband; two sisters, Mrs. A. C. Fisher of Didsbury, and Mrs. Gilmore of Vancouver; three brothers, Mr. Otto Mueller and Mr. Robert Mueller of Ghost Pine, and Mr. William Mueller of Shawinigan Falls, Quebec.

The funeral was held at Three Hills on Wednesday afternoon.

CHARLES CUMMINGS.

We are sorry to announce the death of Mr. Charles Cummings which took place at the Didsbury Hospital on Wednesday, September 19th, at the age 69 years, after a long illness patiently borne.

Born at Ambey, Illinois, he moved to Alberta in 1910 where he has since resided. He leaves to mourn his loss his wife, May, and one daughter, Mrs. Roy Black of Garrington.

The funeral took place at Didsbury cemetery on Friday afternoon, and the number of relatives and friends from Garrington, Bowden and Calgary who attended bore witness to the esteem and respect in which he was held.

MRS. MARY HUGHES.

The death of Mrs. Mary Hughes occurred at her home on Monday, September 24th.

The funeral services will be held at Westcott United Church today (Thursday) at 2 p.m. and the interment will take place at Westcott Cemetery.

## Creamery Survey.

A creamery survey that will continue for about two weeks is being launched under the joint auspices of the provincial dairy branch, the University of Alberta, and the Dominion department of agriculture.

J. R. Sweeney, Alberta dairy commissioner, is in general charge of the work and will arrange the itinerary of the field workers.

The purpose of the survey is to make a study of the cost of manufacturing butter in Alberta, and also of the cost of trucking or otherwise delivering cream supplies. It is proposed to examine 50 per cent of the creameries in the province, of which there are 94 now operating.

## Federal Agency Will Peg Wheat at 81 Cents

Examination of the day-to-day quotations at the three leading wheat markets of the world, Winnipeg, Chicago and Liverpool, reveals a more stable condition here (Winnipeg) than has prevailed either to the south or overseas.

Asked for the reason of this firmness at Winnipeg, compared with the world's leading grain markets, almost any grain man would reply it is evident that our market is receiving stabilizing support from the Dominion government agencies. It is, in fact, pretty generally accepted that prices here will be maintained by the same agencies whenever the October price approaches 81 cent and the May 85 cents a bushel.

That the Winnipeg market should be given some artificial support at this particular time seems justified by examination of the facts.

## Tenders Called for Olds-Sundre Road

According to the news bulletin issued by the Alberta government, tenders have been called for the grading of 13 miles of road from Dog Pound Creek to Sundre on the Olds-Sundre road.

Tenders have also been called for highway construction work for the following sections of main highway, which include the grading of these roads: Hardisty to Hughenden 19 miles; Coronation to Veteran 17 miles; Innis to Wainwright 18 miles; Edmonton to Gibbons 25 miles; and Granger via Carbon to junction with No. 9 Highway, 16 miles. This is in addition to contracts already awarded for highway work in other parts of the province.

Definite announcement of the re-opening of the Vermilion school of agriculture on October 30, was made this week by Hon. F. S. Grisdale, minister of agriculture. The school at Olds will also open at the usual time this fall. The Vermilion school will draw pupils from the Peace River country south to the Camrose line of the C.P.R., while the Olds school will draw from the balance of the territory in the province.

## Now It Could Be Done

Probably it is as direct reaction to the appalling state of rampant unrest which keeps international nerves continually on edge that more is being written and heard now of peace and its perpetuation than was heard of written during the great peace which terminated in the framing of the Treaty of Versailles.

The Anglo-Saxon world, at least, has come to the conclusion that a treaty inspired by revenge and nurtured by fear is altogether too provocative an instrument to produce anything more than a more armistice of truce. That section of the world now is convinced that the Christian virtues of humility and fraternity could and would provide a better background for an abiding peace featuring the essential conditions of harmony and mutual co-operation.

It is hard to concede that mankind is devoid of capacity to bring about this condition or state. In fact, when one scans the war efforts of the belligerent nations between 1914 and 1918, one is forced to conclude that only the Will is lacking. Were the efforts made, then, to destroy and property exerted now to preserve life and property, world peace quickly would be achieved. There is no doubt of it.

If doubts be cherished, they would quickly be dispelled by reference to the recently published "War Memoirs" of David Lloyd George. First as Britain's Minister of Munitions then as her premier, Mr. Lloyd George was primarily responsible for organizing the country's human and industrial resources for victory. His estimate, however, of the human cost of the war is vividly revealed in the pages of his narrative. All essential industries were brought within the compass of his authority. All were made to contribute their full quota to the national effort. That gigantic organization was established for the dual purpose of building up the allied, and of breaking down the enemy, capacity to endure. The achievement shows conclusively what can be done by organization on the grand scale.

Considering the efficiency of war-time organization and effort, surely it is not foolhardy to suggest that, were all the major nations of the world to unite in organizing in the cause of peace, lasting and prosperous peace would ensue. And were the same efforts applied to solving the economic problems of the peoples of the world unquestionably they, too, would yield.

It is a strange commentary on civilization and human progress that sacrifices to win a war should be described as "heroic" and, as such, borne with determination and a grin, while sacrifices to win a peace should be branded as humiliating and intolerable. It is strange, too, that war could be financed with no insuperable difficulty, while finances required in an economic depression to keep innocent people from starvation, present apparently insurmountable obstacles to the governments concerned.

Nicholas Murray Butler, noted American liberal, recently translated the financial cost of the world war into graphic and startling terms. It cost 499 billion dollars. "With that money," he says, "we could have built a \$2,500 house, furnished it with \$1,000 worth of furniture, placed it on five acres of land worth \$100 an acre, and given this home to each and every family in the United States, Canada, Australia, England, Scotland, Wales, Ireland, France, Belgium, Germany and Russia. We could have given to each city of 20,000 inhabitants and over in each country named, a five million dollar library and a ten million dollar university. Out of what was left we could have set aside a sum at five per cent. that would provide a \$1,000 yearly salary for 325,000 teachers, and a like salary for another army of 125,000 nurses."

Four hundred billion dollars was expended in a war which took 30,000,000 lives. Surely, a similar amount expended in a peace, would save a similar number from sufferings attendant upon economic depression.

### Recover Sunken Gold

Five Million Dollars Removed From Hold Of Steamer *Laurentie*

Bullion valued at £1,000,000 (\$2,500,000), was removed by a private salvage firm from the sunken steamer *Laurentie*, which went to the bottom with a German torpedo in 1917, the *London Mail* says.

Admiralty divers salvaged £5,000,000 between 1918 and 1924 and abandoned the remaining £1,000,000 because the ship had been smashed and buried in the sand.

Salvage operations on the steamship *Laurentie*, a 15,000-ton White Star liner which lay in 120 feet of water, are known to be among the most difficult ever attempted.

British navy divers clad in rubber suits made more than 5,000 dives to recover £5,000,000 worth of bullion.

The *Laurentie* was sunk on the south of Lough Swilly in Northern Ireland, in a position exposed to westerly and northwesterly gales.

### Mail By Rocket

German Invention May Short Letters From Dover To Calais

A rocket mail service may be established between Dover, England, and Calais, France. The enterprise would employ the "Zucker" aluminum rocket, a German invention which was exhibited at the International Air Post Exposition in London the first part of May.

It is estimated that by means of the rocket service letters may be shot across the English Channel, a distance of 21 miles, in one minute.

The rocket is controlled locally by a motor, after demonstrating the practicability of such a service, intends to approach the British and French governments with a view to arranging for a regular rocket mail service. A British syndicate being formed for the purpose. Under the proposed scheme, Calais would be the receiving and dispatching point for the continent.

## Looseness Of the Bowels During the Summer Months

It is seldom, during the summer, that most people are not troubled with some form of looseness of the bowels. Generally it develops into Diarrhoea, Dysentery or Summer Complaint, and has a tendency to weaken the system.

Do not check the discharges too suddenly. Do not eat any new or untried remedy but take Dr. Fowler's Extract of Wild Strawberry, a remedy that has been used by thousands of families during the past 38 years.

Do not accept a substitute. Be sure and get "Dr. Fowler's" when you ask for it. Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

### Fight Auto Invasion

French-Canadians Do Not Want Cars On Mount Royal

The only city in the Dominion which boasts a mountain in its midst is in the middle of a small war about the mountain.

Mount Royal, the towering landmark from which the metropolis of Canada derives its name, is the bone of contention in an argument as to whether automobiles shall be allowed for the first time in history to scale its summit.

The mountain broke into the headlines when Ald. J. Allan Bray ventured the suggestion motorists be permitted to wind their way upward to its wooded dells and broad expanses of green overlooking the metropolis. At once a storm of protest broke and thousands of citizens voiced their determination to preserve the primitive natural charm of Montreal's namesake for future generations to enjoy.

One of the few fortresses yet remaining against the advance of the automobile age, Mount Royal has continued to share its picturesque quaintness with Bermuda's motorless avenues. To date only pedestrians, bicyclists and the horse-drawn Victorians which are heritages of another age in Montreal, are allowed on the mountain and the French-Canadians, who regard the great rock as part of the rich tradition of their land, declare the hoisting of the automobile horns will never be allowed to break its spell.

### Have Suffered Most

Thousands Of German Professors Seek Work In Foreign Countries

Some 7,500 academic and professional refugees from Nazi Germany are now attempting to create a new existence for themselves in foreign countries, the New York Emergency Committee in Aid of Displaced German Scholars reveals. It is declared that "of all classes affected by the National-Socialist revolution in Germany, the academic and the professional have suffered the most."

A high commission for refugees coming from Germany is co-ordinating the work in various countries. Sixty German scholars have been placed in American institutions of higher learning. More than 1,300 German scholars have been displaced, of whom 600 to 700 have or will shortly emigrate. Between 5,200 to 5,500 professional people have left Germany and 1,500 to 1,600 of the 7,000 German university students forced to quit their studies have sought refuge outside Germany.

### Alberta Teachers

Considerable Versatility Is Demanded By School Boards

Some Alberta school boards apparently demand considerable versatility of talents in their school teachers. This was revealed at Edmonton as the hearing of appeals for alleged wrongful dismissal of teachers continued before Judge MacDonald, sitting as a board of reference.

A young woman teaching in the Williamson district claimed she had been dismissed because she could not play the piano.

Another board, through its chairman, stated that the teacher had been dismissed because she was too high strung and was continually hanging the pupils on the bridle.

### Wanted His Razor

Portland Man Would Shave With Blade That Almost Killed Wife

You can choose your own title for this one. Here's the story. A little man entered the police station at Portland, Oregon, and asked for the razor which his wife used to slash her throat in an unsuccessful suicide attempt a few days ago.

"What do you want with the razor?" a police sergeant asked. "I want to use it," the man replied.

It was suggested that he buy a new razor.

In her 53 flights across the Atlantic, the Graf Zeppelin has never been more than an hour behind her schedule and in most cases she has been several hours ahead.

The Alaskan coast, on Disappointment Bay, rose 47 feet during the 1939 earthquake.

### Gigantic Cunard White Star Liner

Some Startling Facts About The New Queen Of The Seas

The name of the new Cunard White Star superliner now known as No. 531 will be divulged 24 hours before the hull slips down the ways at Clydebank, Scotland. Queen Mary, attended by King George V., will launch the new steamer. The ship will be at least 1,018 feet long and register 75,000 or more gross tons. She will cross the Atlantic from England and France in four days. The cost of the superliner has been estimated at \$20,000,000. The vessel will have 11 decks, one the first class promenade being 750 feet long, just 25 feet less than the entire length of the Mauritania. She will be five times the length of the original Cunarder, the Britannia. The height to the masthead will be 250 feet. The hull will weigh 165 tons. The Aquila in its hull will be used. The steel plates range from 8 feet in length to 30 feet, and weigh from 200 to 6,000 pounds.

There will be 2,000 portholes and windows, the panes of glass ranging from 12 inches in diameter to large oval portholes 10 feet in height. The anchor cables, wire hawsers and ropes for the ship will be more than four miles in length. The anchors, of special design, will be the world's largest. There will be 60,000 cubic feet of refrigerating space. The automatic steering gear will be the largest on any ship. The ship will be driven by single-reduction geared turbines supplied with steam from high-pressure water-tube boilers. There will be four screw propellers, each driven by an independent set of machinery. The driving machinery will supply power to the auxiliary machinery. Three others will supply light and power for the hotel services. The ship's oil fuel will be used. The propellers will each weigh 35 tons and measure 20 feet from tip to tip. There will be 27,000 turbine blades, varying in length from two to 18 inches and geared to the thousands of the ship's turbines. The Clyde River has been widened and deepened for the launching at a cost of \$400,000. The superliner is being built in the yards of John Brown & Co. Ltd., where the Aquitania was built.

There will be three funnels. The first funnel will be more than 70 feet in height, 110 other two lower. This arrangement will keep the decks and funnels clear of funnel gases. The hull of the first Cunarder, the Britannia, could be passed through any one of the funnels of the new superliner. The ship will contain 50 miles of plumbing pipe. The electric lighting system is sufficient to service a city of more than 150,000 inhabitants, such as Quebec, Hamilton or Ottawa. Steam will be generated in 27 enormous boilers. The number of tubes in the main and auxiliary condensers will approximate 60,000. The electrical wires used would reach from Halifax to Vancouver or then 400 miles into the Pacific ocean.

The giant's stacks will be thirty feet in diameter, exceeding the Holland Tube, between New York and Jersey City, by six inches. From the keel to the top of the funnels the ship is equal to the height of an 18-story building. The engines of the 531 will generate 200,000 horsepower—enough to tow Staten Island across the Atlantic. The make up of the ship will require 35,000 tons of steel.

The catering department will contain 200,000 pieces of crockery. Ten miles of carpets will be used in covering the ship's floors. Tableware, including knives, forks, spoons, etc., will total 100,000. The ship's decorations will cost \$2,000,000. Her steadiness will be assured by a million-dollar gyroscopic device weighing 300 tons. This device will keep the ship steady in the roughest seas. The captain's bridge will be 100 feet above the water line. The steamer's ventilators will be large enough to swallow a subway car. The sun deck will contain shady garden lounges, palm courts and swimming pools, giving a tropical aspect to the surroundings during all the seasons. The steamer will be insured for approximately £1,000,000.

The "lost world" of southern Venezuela is being explored by a scientific expedition.

### Commemorate Early Flight

Aeroplanes Kept In Air From Dawn To Dusk At Edmonton

The twenty-fifth anniversary of flying in Canada was effectively commemorated at Edmonton recently when some 15 members of the Edmonton and Northern Alberta Aero Club kept an aeroplane aloft for 15 hours, 15 minutes in "a dawn-to-dusk" flight.

In common with other flying clubs across the Dominion, the flights were carried out, each machine staying in the air for shifts of one hour, to be replaced by another before the first had touched the ground.

Pilot C. North Sawie, hopping off at 5:00 a.m., was the first to commence the flight, while Pilot Sven Jensen was the last to land who brought his machine down at 6:55 p.m. after a black rain cloud and thunder made the sky too black to continue.

Miss Margaret Fane was the only woman pilot to take part in the commemoration of the flight made by "Casey" Baldwin, who hopped off in his crudely-made "Silver Hawk" 25 years ago, August 16, in Nova Scotia.

### London's Newest Building

Has Hotel Service And Every Accommodation For Tourists

"Flatla" is the newly coined name to describe a \$10,000,000 block of flats which is being completed in London. The name is intended to describe flats having hotel service. There will be 50 flats, accommodating 1,200 people. As far as possible every daily want of the tenants—food, clothing or service—will be available within the building. A shopping expedition of the flat-dwellers will be merely a trip to the ground floor, and there will be restaurants, dining rooms, barber shops and beauty parlors. A novel feature will be a terrace, 16 feet wide, surrounding the top floor of the building. It resembles a liner promenade deck and will be available for sun-bathing and exercise.

Tests have shown that actors or speakers in a hall should speak louder in cold weather, because the heavy clothing of the audience absorbs more sound.

The total length of the Amazon river from the head waters of the Ucayali is about 3,300 miles.

## CAN'T SLIP OR SLIDE FALSE TEETH

Don't use any old kind of remedy to keep false teeth in place—use a reliable, re-gained one which dentists prescribe such as Dr. Wernett's Powder—the largest seller in the world—grips teeth so secure yet comfortable they feel natural. Positively no slipping or clicking—blissful comfort assured all day long. Forms a special comfort cushion to protect teeth and gums. No odors, gummy paste keeps mouth sanitary—breath pleasant. Luxurious—all druggists.

## Facts Go To Prove That The West Is Rapidly Learning Its Lesson Of Diversified Farming

By SENATOR W. A. BUCHANAN  
In Canadian Business

Alberta leads Canada in per capita production of commercial hogs. Started badly, Alberta last year marketed 1,032,169 hogs through the recognized commercial channels. This constituted 32.6 per cent. of the commercial hogs produced in the Dominion in 1933. With 7.5 per cent. of the population, we produced almost one-third of this important branch of livestock marketing.

It would be well to have this fact about Alberta more generally known throughout Canada, especially to the financial, manufacturing and business interests generally. For so long the people of the West have been called "wheat miners" and "soil robbers" that there is a strong tendency to blame the financial ills of the West on poor farming. We have heard Eastern men, high in the business or financial world, say so often, "If you people out West would grow something besides wheat, a bad crop wouldn't cause such a depression," that we had almost come to believe it ourselves, and to wonder if, after all, we were such bad farmers. But the 1933 census furnished us the figures to prove that, farmer for farmer if not acre for acre, we have nothing to be ashamed of.

The last census figures showed that there are more dairy cattle per farm, more beef cattle per farm, more hogs per farm in Alberta than there are in the banner province of Ontario. Check the Statistical Branch at Ottawa for the proof. Take the figures for commercial hog marketings last year as further evidence.

Alberta in 1933 marketed 1,032,169 hogs. Ontario, with more than three times the population, marketed 1,300,600 odd. Quebec, second largest province in point of population, marketed a mere 616,000 head.

We did our share in beef cattle production in 1933, too. Alberta marketed last year 123,000 head of cattle shipping 10,488 of them to the Old Country to find a market. Our combined cattle and hog marketings provided approximately 200,000-600 pounds of beef and pork for consumption. Alberta's consumption of these two meat commodities is in the neighborhood of 93,750,000 pounds annually. Our surplus, for what we had to find a market outside the province, was more than our home consumption.

At a time when Canadians are being told that they must curtail their production of wheat, which is the West's financial mainstay, this matter of livestock production and livestock marketing takes on a double significance. If we take acres out of wheat we must either give them over to coarse grains and pasture for livestock, or let them go back to weeds. And we have millions of acres of virgin land available for cattle and sheep grazing upon which we can expand the livestock industry without taking an acre out of wheat. Alberta has practically tripled hog production between 1921 and 1933 while, at the same time, we have practically doubled our wheat acreage. It is being forecast by livestock officials that we shall soon be leading Canada in hog production, it being pointed out that Ontario has come close to the saturation point in the production of pork. The incidence of higher pork prices during the past year due to the increasing market for Canadian bacon in the British Isles is just the stimulus needed to encourage hog growers to expand their holdings.

What has happened in hog production is happening in production of dairy products in Alberta. In 1933 the province set a new all-time record in creamery butter production, in the neighborhood of 25,000,000 pounds, and the value of commercial dairy products approximated \$12,750,000 as compared with a total valuation of \$52,000,000 for field crops another evidence that, so far at least as the West is concerned, we are rapidly learning the lesson of diversified farming.

Dairying and hog production.

W. N. U. 2061

therefore, are rapidly taking up the slack in our agricultural fabric. But, as is the case with wheat, we in the West are producing much more than we consume, and the importance of markets abroad grows more acute. Whether in these days of extreme nationalism throughout the world, the West can go on expanding livestock and dairy production while holding its place as the world's largest producer of fine milling wheat will depend entirely upon what can be done to break down the tangled web of import restrictions which have so greatly curtailed world trade. The West would like to increase livestock production, and Alberta during the depression has shown that it can be done. It only remains for markets abroad to offer opportunity for a further expansion of this phase of the farming industry.

The fact is proven today that the West is "mixing" its agriculture. It is diversifying according to the best practice, and it is becoming accepted at it. No longer can we be accused of being a "one crop" country.

By Ruth Rogers

### PLENTY OF FREEDOM FOR WEE MAIDS

Characterizes French model for pre-kindergarten and kindergarten ages.

This adorable little frock of sprigged dimity shown today, finished its sleeves and waistline with lace banding and program ribbon. The edge of the sleeve has a val lace trim, to match the crisp white organdie collar edge.

The full-gathered skirt allows plenty of freedom for romping about. It's also pretty as can be and practical too, carried out in pale blue and white tiny checked gingham, pink and white candy striped percale, red and white plaid lawn, etc.

Style No. 523 is designed for sizes 2, 4 and 6 years. Size 4 requires 1 1/2 yards of 35-inch material with 1/2 yard of 25-inch contrasting, 2 yards of lace, 1/2 yard of ribbon.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

### Canard White Star Superliner

Massive Propelling Machinery Being Installed Most Powerful Ever Constructed

Rapid progress is being made in the construction of the propelling machinery for the Canard White Star superliner No. 534, which will be launched at Clydebank at an early date by Her Majesty Queen Mary, attended by the King. When completed, this installation will be the most powerful ever constructed for any liner and the spaces reserved in the ship for turbine boilers and auxiliary machinery will equal the total length of some large Atlantic liners. The combined length of the four sets of engines, one of which has been completed, is more than 200 feet, while no fewer than five separate rooms will be needed for the 27 enormous boilers, nearly all of which are now ready. The main steam piping leading from these boilers to the engines would cover a straight distance of 2,500 feet. The number of tubes in the massive main and auxiliary condensers will approximate 60,000.

The installation of this propelling machinery calls for the attention of highly specialized mechanics. Every one of the 257,600 turbine blades, varying in length from two to sixteen inches, requires expert testing by hand. The gear wheels, of which there are four, received three months of delicate cutting and are lined up to a thousandth of an inch.

Holes in the stern of the hull are ready to receive the propeller shafts. This installation consists of a series of forged steel shafts approximately 33 feet long. When joined together each complete line of shafting will extend a distance of nearly 230 feet, being actually nearly 20 feet greater in length than the hull of the first Canard liner, "Britannia".

The greater part of the propelling machinery will be fitted into the ship after the launching. Owing to the size and weight of the various parts it will be necessary for them to be hoisted in sections.

The four propellers of the No. 534 are the largest ever cast for any ship. Each one will weigh 35 tons and have a spread of nearly 20 feet from tip to tip. The propellers are made of manganese bronze because of its great strength, non-corrosive and non-erect qualities. They were cast in the foundry which supplied the propellers for the British Battleship Hood.

Shall hunting is a sport in France.

## Western Farmers Favor Plan For Planting Tree Belt Across The Dried Out Areas of Prairies

### Some Unusual Operations

Nova Scotia Doctors Have Had Success With Crude Instruments

That story from Chicago about the doctor who saved a child from strangulation with a kitchen knife and a piece of rubber hose, didn't stir up much excitement among Halifax medical men.

They recalled that one of their number had saved a life in just a slightly different way. Without time to get his instruments, he had reached a home where a child lay dead through strangulation.

In the house he found an ordinary jack-knife. While this was being sterilized by boiling he took the father's clay pipe and snapped off the stem close to the bowl. Then he made an incision with the jack-knife, and inserted the pipe stem into the child's windpipe. Life-giving air flowed into his lungs instantly, and subsequently he made a full recovery.

Just as resourceful was another Halifax doctor who arrived at the bedside of a choking woman with only a scalpel. He picked a hairpin from her head; then he cut a slit in her throat and inserted the hairpin.

So that the pin would keep a breathing space open, the doctor tied a length of string to each prong, then brought the strings around her neck and knotted them firmly at the rear. The makeshift enabled the stricken woman to breathe comfortably until she could be taken to hospital for an operation. She too recovered, and to-day is alive and well.

### Girls Take Up Dentistry

Profession Is Attractive To Formosan States Canadian Principal

Formosan girls are attracted more to dentistry than to the other professions, and are making good at it. In the opinion of Miss Dorothy C. Douglas, principal of a school of dentistry in Formosa, who passed through Winnipeg for a furlough at her home in Lucknow, Ontario.

"One girl graduate of our school is an exceptionally good dentist," Miss Douglas added. "She offers a reduction in her set prices to all patients who are Christians."

### STARS GLEAM FOR ROYAL EXILES

The stars are growing more favorable for exile royalty in Europe, observers believe. Dr. Doorn, Holland, the 72-year-old wood-chopping former Kaiser Wilhelm II, casts anxious eyes at his former German domain, where the populace has endured political insecurity for most of the post-war years. Not much farther away than a "Big Bertha" shell could travel, wants handsome Prince Otto at a villa near Brussels, Belgium, hoping to hear trumpets sound for the restoration of the ancient house of Hapsburg to its throne in Austria and Hungary.

With the announcement of the start of the tree belt in the United States comes a suggestion from many farmers in the dried out areas of Saskatchewan that federal authorities should take under consideration a tree belt plan for the bald part of the prairie.

In this connection Alan Beaven, of the Canadian Forestry Association tree planting car, who has been working in southern Manitoba, and is now going to northwest Saskatchewan and Alberta has discussed the proposal of tree belt with hundreds of farmers both in Manitoba and Saskatchewan and he reports that the plan is on the farmers' want, it is feasible it can be done as a relief measure and as to details of inauguration and supervision, these should be left to federal authorities.

There are seven excellent reasons cited by Mr. Beaven for the construction of a tree belt in dried-out Saskatchewan.

These seven reasons are: Cooling effect on atmosphere. Breaking up of damaging winds. Conservation of moisture. Formation of surface moisture. Breeding grounds and homes for insectivorous birds. Improved conditions for diversification in farming. Improved living conditions for the people.

Basis for improving conditions, according to Mr. Beaven, lies in the fact that any program should aim not so much to try to change climatic conditions, but to so alter the entire agricultural system to take the greatest advantage of moisture secured and to break up the disastrous wind sweeps.

Taking periods of time, such as 10 years, moisture and precipitation records and velocity of winds have not changed greatly, but intensive agricultural development has changed their effect on the prairies.

Farming operations, he says, have gone on, until much of the crust has been away with the sod turned to the sun, and then the sweeping winds have started soil drifting, or in other words the development of agriculture since prairie settlement has turned the prairies at this time into a potential desert.

As to the cost of the project, Mr. Beaven points out that it would not cost more than outlays for relief on the prairie to date, and that 90 per cent. of the outlay would go direct to the farmer for labor.

Mr. Beaven has observed that certain protected areas around farm houses in dried-out Saskatchewan during the past five years have produced more of necessities and sustenance, than all the rest of the farm—Regina Leader-Post.

### To Winter Livestock

Plans Discussed At Calgary To Care For Cattle During Winter

Plans for the feeding of Western cattle during the winter were discussed at Calgary by a committee appointed by the Dominion Agricultural Credit Company and representatives of the Central Alberta Farmers' Association, the Old and Southern Alberta Co-operative Association.

Two plans were discussed. One plan proposed feeder cattle be purchased outright from the rancher, the credit company advancing the necessary portion of the money and the farmer the rest. The other called for the advance of 50 per cent. of the steer value by the credit company to assist the farmer in carrying over his stock until next spring.

### Farmer Is Greatest Gambler

Who is the world's biggest gambler? We'd say the farmer. He gambles with the weather, with the soil, with grasshoppers, with army worms, with grubs and a score of other plagues—a desperate chance. If he wins, as he does occasionally, he comes out with a stake; if he loses, which he does frequently, he has a chance to try again. Happily he is a good loser, or the world would starve.

## Fall Versus Spring Plowing.

Fall plowing is rapidly losing favor among farmers. At one time every farmer tried to get his "crop off the land in order to get some fall plowing done." Changes in general farm practice have resulted in the farmer who fall-plows his stubble being the exception rather than the rule.

Experiments in stubble treatments were started at the Dominion Experimental Station at Lacombe in 1911. When this work was started the land was relatively new and free from weeds, was high in organic matter, and no very dry years were encountered. Under such conditions the results were decidedly in favor of fall plowing for wheat.

Results obtained during a later period and under different conditions showed that fall plowing was very little superior to spring plowing, for either wheat or oats. An analysis of the yearly results showed that spring plowing is preferable to fall plowing, when there is a decided lack of moisture in the fall, and that fall plowing will produce higher yields than spring plowing, when the land goes into the winter with a high moisture content.

A study of the experimental data showed that fall plowing in a wet fall was much more productive than that done in a year when the soil goes into the winter with no reserve of moisture. It was noted that fall plowing done early in September, worked down right away, and containing an abundant supply of moisture before winter set in, produced nearly as high yields as summer-fallow. It was also observed that fall plowing, done when the land is dry, and left rough, does not produce nearly as well as spring plowing.

After studying the question of fall versus spring plowing of stubble land for a number of years, it is believed that fall plowing of stubble land cannot be recommended, except when it is particularly free from weeds and contains plenty of moisture. If the land is weedy or very dry, any tillage given in the fall should be given with the disc or cultivator, rather than the plow.

Fall plowing can be recommended only under most favorable conditions and should be worked down as soon as possible to prevent drying out. Soil-dripping has developed as a serious objection to fall plowing.

## "Kritiks' Korner."

Woods and leaves should be burnt and the yards and gardens cleaned up before winter sets in.

The new walk in front of the High School will be a big improvement when it is finished.

We are glad to see that the old Bank of Montreal building is being converted up and put to use again. All success to the new proprietor.

The new E.V. Church is going to be a real asset to the town, but the lot should be graded before freeze-up.

We have been looking forward with great anticipation to the completion of the new Ford service station. It will no doubt be a great improvement when finished.

—OBSERVER

## WEEKLY JOKE

The teacher in a certain school had been explaining to the class the signs of the Zodiac, and after a while decided to test what they had learnt.

"Now Jimmie," she said, "tell me one of the signs of the Zodiac."

"Taurus, the bull," answered the boy brightly.

"Now Willie, another one," pointing to the next boy.

"Cancer, the crab," said he.

"Right again," remarked the teacher, pleased with the class.

"Now next boy, Albert, tell me another sign."

The boy addressed hesitated a few minutes, looked thoughtful and then with a smile of happy recollection, said brightly, "Please Miss, Mickey the Mouse."

as a result of unusually dry weather coupled with high winds. The better the condition in which the fall plowing is left from a moisture-conservation standpoint, the greater the tendency there is for the soil to drift. The objections cited tend to cause fall plowing to be considered with less favor each succeeding year.

## Will Supply Water for Cattle in Dry Belt

Construction work is getting under way on some of the stock watering projects that will come into the new federally-aided relief program of public works in Alberta, involving a considerable amount of dam-building. An actual start has been made, it is stated by the Hon. J. J. MacLellan, minister of public works, on the damming of Ross Creek, but a short distance southeast of Medicine Hat.

The Ross creek project will be the largest to be undertaken in the province as part of the present program. It will dam back the flood waters of the stream for 1½ miles and will serve a large district with an increased water supply for the stock.

A diversion for the purpose of raising the water level in Elkwater lake is also being considered.

Mr. MacLellan says that a number of other projects for constructing dams in the south country are now under consideration by the government's water resources staff, whose approval is necessary.

## The Objective!

Alberta Pool Elevators are out to prove that a co-operative grain-handling concern can be an instrument of usefulness to all grain-growers—and a successful business concern as well.

EVERY grain-grower in the vicinity of an Alberta Pool Elevator is invited to aid in this effort to perpetuate in Alberta, by Alberta farmers, for the good of all, a strong, grower-controlled, co-operative elevator organization.

This can be done with advantage by delivering your grain in wagon or car lots to

## ALBERTA POOL ELEVATORS

# A FURTHER STEP on the Road to Recovery

## A Statement by the Prime Minister of Canada

THE Dominion of Canada will offer for public subscription within the next few days the 1934 Refunding Loan. It is an undertaking of such significance to every citizen that I think it fitting to present this brief explanation of its close relation to the welfare and continued progress of our country.

The 1934 Loan is not an incidental effort. It is a part—and an essential part—of the great debt conversion programme in which Canada has been engaged since 1931, and by which we are refunding at maturity the large sums borrowed for wartime purposes. The national importance of this programme cannot be over-emphasized. It is important from three aspects: 1—National Credit; 2—National Economy; 3—National Recovery.

### 1. National Credit

National credit means to a nation what an honest reputation means to a man. Its maintenance is a primary essential and necessitates that each obligation be met fully and promptly, as it comes due. Our debt conversion programme is then, in the first instance, our method of meeting our obligations and thus maintaining our credit.

By this programme Canada has already refunded \$353,000,000 of maturing wartime debt, and completion of the 1934 Loan will bring the refunded total over one billion dollars. As a result, Canada's credit stands notably high, both at home and in the great money markets of the world.

Striking evidence of our high credit standing was given within the last few months when Canada secured immediate over-subscription of a long-term loan in London at a price to yield the investor less than 3½% net. In New York, obtained a one-year Loan of \$30,000,000 bearing interest at 2 per cent. And there is equally striking evidence at the present moment in the fact that every internal issue of Dominion of Canada Bonds now outstanding is selling today at substantially above its issue price. The two-year 4½ Bonds of the 1933 Refunding Loan, issued at 96½, are now selling at 104 to yield approximately 3½%.

### 2. National Economy

The debt conversion programme, in the second place, is providing substantial savings in public interest charges. The debt which we are refunding was incurred with interest rates at artificially high wartime peaks. Refunding is now being accomplished with interest rates throughout the world moving steadily downward toward more normal levels—an encouraging world movement which is essential to business recovery. By refunding under these conditions Canada has already obtained a reduction of the previous interest charges amounting to more than \$9,000,000 per annum, and completion of the 1934 Loan will provide a further saving of over \$5,000,000 per annum.

The annual saving of over \$14,000,000 thus secured has a direct cash benefit to every tax-payer. This saving has much more than offset the interest charges on the debt which has been incurred to meet the extraordinary burden of unemployment relief. It has, to a considerable extent, offset the heavy burdens which the depression period has imposed with respect to railway and other current requirements. It will also pave the way to tax reductions with the return to better times.

### 3. National Recovery

The debt conversion which Canada has achieved since 1931, by thus maintaining national credit and securing national economy, has been a major factor in our progress toward business recovery.

A year ago, preliminary to the 1933 Refunding Loan, I took occasion to express the belief that Canada had passed the low point of depression and was definitely upon the road to recovery. Today, our progress toward recovery is a matter of established fact. Since the low point of February 1933, the trend of business has been moving steadily upward in an unbroken and marked and so consistently sustained that we need no longer doubt its reality.

The facts of business recovery are written beyond dispute in our statistical records. The most significant indices relate to physical volume of business, industrial production, output, electric power production, employment and prices. Here is the record in each case:

	During Past Year	Since Low Point of Depression February 1933
Physical volume of business.....	13.8%	42.8%
Industrial Production.....	15.7%	56.9%
Carloadings.....	10.3%	29.4%
Electric Power Production.....	12.4%	32.7%
Employment.....	14.7%	17.1%
Wholesale Prices.....	4.0%	12.7%
Farm Products Prices.....	7.7%	43.3%

\*In the case of carloadings, employment and prices, the latest figures available are those for August; in other cases, those for July.

Our external trade figures are equally encouraging. During the first eight months of the present year, exports of Canadian products increased approximately \$99,000,000, or 27.7% over the same period last year. The corresponding increase for imports has been slightly under \$93,000,000, or 32.2%.

### A Further Step

Anyone who reflects upon these three aspects of credit, economy and recovery will at once appreciate that the debt conversion programme is vitally important to every Canadian and that, consequently, the success of the 1934 Loan is the personal concern of every man and woman in the Dominion.

The 1934 Loan is a further step in a great national undertaking; its success means a further step on the road to recovery. I know that I need not stress the attractiveness of the Loan as the soundest possible investment, for that will be universally recognized. I do, however, earnestly call upon my fellow Canadians to support this Loan to the limit of their abilities as an opportunity to promote the national welfare. I know of no way in which the individual citizen can render greater service to himself and to his country.

*P. S. MacLellan*  
PRIME MINISTER OF CANADA

**Burnside Notes.**

The date of the Hard Time Dance being put on by Lone Pine W.I. in Lone Pine Hall, has been changed to this Friday evening, September 28, instead of a week later. Halliday's Orchestra will furnish the music. Good prizes for the best hard time costume, singles and couples. Wear your old clothes and come and have a good time.

Mr. and Mrs. A. B. Dyck and family were Sunday supper guests of Mr. and Mrs. Bert White at Bancroft.

Mrs. Joe Clarke and Mr. Ralph Long spent Tuesday with Mr. and Mrs. A. E. Thompson.

**Announces Initial Payment.**

The Alberta Wheat Pool announces that commencing October 1, wheat placed in the 1934-35 pool will receive an initial payment, based on No. 1 Northern, Vancouver, of 50¢ a bushel. The pooling of wheat, of course, is entirely optional with the grower. Those desirous of placing wheat in this pool should see the Pool Elevator agent.

**Donations of Vegetables**

Appeal for donations of vegetables for those districts having a shortage of these to be shipped into the relief areas of the province is being made by the provincial department of agriculture. Local organizations such as boards of trade, service clubs or church societies are asked to supervise the collection and loading of such supplies, which are to be made in carload lots, and the department of agriculture will direct the shipment, while the railways have agreed to transport the supplies free of charge. The cars will be shipped care of the municipal secretaries in the various districts concerned, and these officials will have charge of the distribution of the donations. Some 50 carloads of such supplies are needed this year, to serve some 3,000 families. Already a number of donations have been received.

Mr. Buckingham of the provincial department of Agriculture was in town on Wednesday looking over the possibility of this district donating a car or half car of vegetables.

**Thinks 1935 Carryover Will Be Small.**

"There is every expectation that here will be a very small carryover at the end of July, 1935," James Richardson stated to Quebec newspapermen prior to unbarbering for Europe. Mr. Richardson expressed his opinion that the whole of Canada's 1934 wheat crop will be sold, due to the dispersion of excess surplus of world wheat stocks from trouble.

**NOTICE**

Notice is hereby given under Section 48 of the Domestic Animals Act (Municipalities) that One Light Brown Mare, no visible brands, was impounded in the pound kept by George Mett, and located on the N.W. 24-38-27-4 on the 8th day of September, A.D. 1934, and that said animal was sold on the 22nd day of September A.D. 1934 to Peter Weber, Bremen, of Sunnyside.

Said animal may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in The Alberta Gazette, upon payment of all fees and costs due to the municipality and the purchaser of said animal.

For further information apply to the undersigned.

A. BRUSCO,  
Sec.-Treas. of the Municipality of Mountain View, No. 110,  
Didsbury, Alberta.

**No Election This Year, Says Premier R. G. Reid**

Demands from Liberal quarters for an immediate general election will not be acceded to by the provincial government, Premier Reid made clear Saturday.

A general election this year had not been considered as a remote possibility, the premier told interviewers.

**Tenders Wanted.**

The town of Didsbury invites tenders for the purchase of the following:

Three Granaries, each having a capacity of 2000 bushels; a Hog Slicer; a Platform Scale and a lot of Hog Wire.

These articles may be viewed on the property at present occupied by Mr. Otto Klein at the south end of town.

Also a quantity of red wood tank staves which can be seen at the Power House.

Sealed tenders will be received at the Office of the Secretary-Treasurer up to the 1st day of October, 1934.

The highest or any tenders not necessarily accepted.

W. A. Austin, Sec.-Treas.,  
Town of Didsbury.

## WORLD HAPPENINGS BRIEFLY TOLD

Raymond Poincaré, former premier of France, who "saved the franc" in 1925, recently observed his 74th birthday.

The price of flour in London was reduced one shilling per bag of 800 pounds. The new price is 31 shillings and sixpence including the four shillings provided by the Wheat Quota Act.

Premier Mitchell F. Hepburn, of Ontario, declared his government would welcome introduction of unemployment insurance by the Dominion administration.

Ten United States army bombing planes, comprising the Alaska flight squadron, landed at Bolling field, Washington, recently, completing their 10,000 mile round trip to the north.

Kidnapping, not murder, is the most heinous crime of this era, B. K. Sandwell, editor of the Toronto Saturday Night, declared in a recent address.

The discovery of a vegetable fluid which may supersede the use of blood for purposes of transfusions was made known to the delegates of the 26th annual convention of the Vegetable Growers' Association of America at Toronto.

Premier Benito Mussolini is not necessarily unfavorable to restoration of a monarchy in Austria or even over a combined Austria-Hungary, he told Archduke Otto Von Hapsburg in a secret interview recently in Italy.

We shall not only oppose a recommendation of a 40-hour week as the means for relieving unemployment, but we are firmly opposed to such a system," was the conclusion of an inquiry by the League of British Industries, in a report on the question.

Amey Johnson Moulton will be the first woman pilot on the regular cross-channel service. She accepted a post as commercial pilot with Imperial Airways, explaining she wants the maximum practice before she enters the London-to-Australia air races with her husband next October.

Prospecting for diamonds will be undertaken for the first time in British Columbia's history by Thomas W. Hindmarsh and George Osgden, both of Vancouver, B.C. Leases on two 10-acre pieces on the Nechako river, sought by the two men for this purpose, were approved by the provincial cabinet.

### Wheat Exports

Total Exports For Past Twelve Months Show Falling Off

Wheat sent to the United Kingdom in July totalled 8,214,546 bushels of the value of \$8,575,782 compared with 10,372,224 at \$7,801,221 a year ago, the bureau of statistics announced. The total export of wheat to all countries during the past 12 months was 70,000,000 bushels less than in the previous 12 months and to the United Kingdom about 42,000,000 less.

July export of wheat from the United Kingdom was 294,595 barrels, valued at \$935,326, compared with 235,044 valued at \$824,972 a year ago. The export to the United Kingdom in the past 12 months was 2,718,114 barrels, valued at \$9,331,958, compared with 2,373,062, valued at \$7,620,050 in the previous 12 months. The export to the United Kingdom is about half of the total export to all countries.

### Must Be A Habit

Magistrates, Free Man Because Charge Carried In Left Pocket

In which trouser pocket does a man carry his change? The question arose in a recent case in a Rhyl, Wales, court. A man accused of stealing a shaving brush from a drug store said he placed it in his right hand while he put his left hand in his pocket for the money. The druggist then showed him a dealer's brush he had bought. Near home he found he still had the cheaper brush in his right hand and before he could return it the police came. After his testimony, the magistrates placed their hands in their trouser pockets. Their money was in their left-hand pockets, and they freed the man.

W. N. O. 2061

### Living In Poverty

But Paul Poirot, Famous Dress Designer, Expects To Stage Comeback Still living in his penthouse apartment in Paris, but dependent for food and clothing upon charity and a 70-cent daily unemployment dole, Paul Poirot is dreaming of a comeback in the dressmaking realm he once ruled.

"I spend most of my time with sewing and cloth," said the former king of Paris dressmakers, as he told of his misfortune. "I cut out dresses. Sometimes someone will buy one and I will start on the road back to success."

"I haven't given up," he declared firmly, although he has been out of work for 15 months and stands in line with thousands of others to get his card punched and receive his dole. He does not know how much longer he will be able to keep the penthouse apartment, sole remaining sign of his former great success.

Once Poirot's entertainment in his chateaux and his three yachts attracted the aristocracy of the world.

### Folks Are Generous

Detected Dressing As Mendicant Collects \$10 In Six Days

A Scotland Yard detective disguised himself as an ex-soldier selling matches, when he was in search of a "wanted" man. In this disguise he stood on a prominent London sidewalk for six days and eventually received a donation of \$10 from kind-hearted passers-by. Most of the contributors merely passed him a copper or two without bothering to take his matches.

Authorities of Scotland Yard have ordered the money to be paid into police funds.

Glass domes have been installed on British military aeroplanes to protect machine gunners from wind and increase the accuracy of their firing.

## "JACK MINER AND RELIGION"

By REV. W. E. MCKILLIP, D.D.

Jack Miner, the Canadian naturalist, lecturer and author, was recently asked to what were his religious beliefs. The bird lover paused for a moment and then quietly replied very emphatically:

"I believe in any religion that is for the betterment and uplift of humanity. I belong to the Methodist Church, which is now part of the United Church. I suppose the principal reason for this is, when I was but 24 years of age, I was married; my wife belonging to that church. As I belonged to no church then, I felt it my duty to go with her. I firmly believe there would be more happy and happy homes if husbands and wives attended the same religious services, whether it be Roman Catholic or Protestant.

Well, you say you believe in any

Jack Miner asked to liberate a tugged Canada Goose to study their route of migration. One side of the tag has Jack Miner's Post Office address, while on the opposite side of the tag is a verse of scripture, which is Jack Miner's unique way in spreading the Gospel to the Indians and Eskimos of the far north.

religions that are uplifting and for the betterment of humanity, and yet you belong to the United Church."

"I believe," replied Jack Miner, "every man should belong to some church which gives him one central place of worship and which will cause him to take a more active part in Christianity than he would if he drifted from one church to another."

"When you have been away from home every Sunday, I have seen you making your way to various services in different churches. From early Roman Catholic mass to the Jewish synagogue. Why do you drift around like this?" asked the reporter.

"Well," said Jack Miner, "it's an education and keeps a man from becoming too narrow minded and broadens his spiritual side of life. I always make it a point to try to be home with my family on Sunday."

## Little Journeys In Science

### INSECTICIDES

(By Gordon H. Guest, M.A.)

Insecticides are classified into poison sprays, or stomach poisons, and contact poisons. The former cause death when taken internally, while the latter bring about destruction of life by mere contact. Pyrethrum belongs to the contact class of insecticides. Arsonic compounds are usually found in poison sprays. Finely divided lead arsenate suspended in water is used extensively and is very effective. Calcium arsenate is much cheaper and more abundant than lead arsenate. It is used to wage war against the bollweevil, which is very destructive to the cotton plants. It is also used to destroy the potato beetle. Aeroplanes are employed to drop the calcium arsenate in the form of a fine dust upon the cotton plant.

Oil emulsions, produced by the addition of fish-oil soaps to oil, are used to a considerable extent. Nicotine, a complex compound found in tobacco, is rapid and effective in the destruction of insects. Lime-sulphur spray is used against scale insects. This is prepared in concentrated form by boiling together water, sulphur, and slaked lime. Prussic acid is used as a fumigant in greenhouses and on nursery stock. It is an extremely poisonous substance.

Many of the poison gases used in the late war have been tested to discover if they might be used in the warfare against insects. One of these, chloroform, is the most promising. Only a few of the more important insecticides have been mentioned. Science is continually developing new destructive agents and more efficient ways of applying them in this everlasting struggle of mankind against insects and fungi.

It's easier for a woman to hold a strong man than her own tongue.

### Price Does Not Count

Bears 'No Relation To Nutrition Value Of Food

A two-penny kipper has infinitely more food value than two shillings worth of caviar. Expensive foods more frequently make for fatness than fitness.

These are two points made by Sir Charles Higham, who has recently been collecting information as to how price relates to the nutritive value of foods. "My conclusion," said Sir Charles in an interview, "is that bread—the cheapest of all foods—heads the list of nutritive foods."

"Many well-meaning people do not realize this fact. The unemployed are often fed on soups, but, as Dr. Hare, of Lincoln, pointed out just recently, thin soup has no nutritive value at all, and even a plateful of thick, nourishing soup, made from pens or potatoes, is only equivalent to half a slice of bread."

Sir Charles Higham's conclusion is that price bears no relation to food value. He quoted Professor Mottram, the authority on dietetics, who says: "It is the demands of the palate which cost most—not those of the body's requirements."

Suppose, for example, we wish to eat at 25 pence a day. We may buy it as bread at three cents per 1,000 calories or as an American breakfast cereal at about 16 cents per 1,000. The effect as regards warming the body and supplying building materials is almost certainly the same."

### Coal Mine Fire Extinguished

Fire In Colorado Mine Was Burning For 25 Years

A coal mine fire that has smoldered nearly 25 years at Mattoon, Colo., is dying out, virtually extinguished by an 11-week battle waged by a crew of 25 men working under the direction of the United States geological survey.

Recently workmen succeeded in cutting clear around the burning area, leaving it to burn itself out. Hundreds of pounds of explosives were used in surrounding the blaze.

The fire started when campers lit a fire on an outcropping of a coal vein. It has blazed so steadily ever since, eating far into the underground workings.

### Recipes For This Week

(By Betty Barclay)

#### ORANGE NUT BISCUITS

(Makes 18 medium sized biscuits)

- 2 cups sifted flour
- 4 teaspoons baking powder
- 1 teaspoon salt
- 1/2 cup sugar
- 1/2 cup shortening
- 1/2 cup finely chopped nuts

Orange juice

1 tablespoon orange marmalade.

Sift dry ingredients together. Cut in shortening. Add nuts. Beat egg; pour into measuring cup; add enough orange juice to make 1/2 cup. Combine with dry ingredients and add marmalade. Knead a few seconds on slightly floured board. Cut and bake in hot oven (425 degrees F.) for 10 to 15 minutes.

Note: A little more orange juice will be needed with some flours to make the dough soft.

#### CARROTS AND PEAS

- 2 cups cubed carrots
- 1 cup cooked peas
- 2 tablespoons butter
- 3 tablespoons flour
- 1/2 teaspoon salt
- 1/2 teaspoon pepper
- 2 teaspoons sugar.
- 1/2 cup milk.

Boil the carrots until tender. Combine with the cooked peas, heat and serve with melted butter or make a sauce of the flour, butter, milk and seasonings, add the cooked carrots and peas, heat and serve hot.

Office Boy: "I ain't feeling so good; kin I have the afternoon off?"

Boss: "Why don't you tell me your grandmother is dead?"

Office Boy: "I'm moving her for later in the season."

It takes a wise man to give a woman advice without incurring her enmity.

## Agricultural Notes

Interesting Items Gleaned From Many Sources

Canada exported 37 live cattle to Hong Kong, China, for dairying purposes during the first three months of 1934.

Hogs graded in Canada during the 32 weeks of 1934 up to August 9, totalled 1,882,717, as against 1,968,631 in the corresponding period of 1933.

The general effect of the customs changes in the Fiji Islands is to increase the margin of preference to imports from Canada and other Empire countries.

There has been more tomato puree, tomato sauce and ketchup, and tomato soup imported into the British Isles from Canada than from any other country during the first six months of 1934.

Reports from Moscow show that there has been considerable difficulty in the Russian production of harvesting machinery, particularly harvester combines, and this has had an effect on harvesting arrangements.

The total stocks of Canadian wheat in Canada on July 31, 1934, were 193,222,863 bushels—18,417,325 bushels less than the total on the corresponding date in 1933, but 61,478,057 bushels more than on July 31, 1932.

Shipments of livestock from Western to Eastern Canada for the 31 weeks of this year, up to August 2, (1933 figures within brackets) included 48,575 (33,062) cattle; 484 (145) calves; 146,015 (199,575) hogs, and 45,000 (33,945) sheep.

For the first six months of 1934, Canada exported to the London (England) market for the 31 weeks of this year, up to August 2, 17,722 cases of pears; 14,355 cases of loganberries; 2,882 cases of peaches, and 40,964 cases of canned apples.

A trial shipment of Ontario apples in hampers made in 1933 to Egypt has been well received. It consisted of Ganos, Baldwin, and Ben Davis, mentioned in order of preference. The Ganos in particular, says the Canadian Trade Commissioner in Egypt, should be able to find an outlet in Egypt so as to meet the demand for red apples.

The meat from which soup has been made became rather tasteless, but it still contains most of its nourishment. Therefore, it may be used in hash, meat pies and ragouts, where the flavour of vegetables and seasoning compensates for the lack of meat flavour. Beef, How to Choose and Cook It, Dominion Department of Agriculture Bulletin.

The Japanese wheat crop of this year is estimated at 44,491,150 bushels. It is considered that the annual consumption of wheat is about 45,000,000 bushels, so that the five-year plan instituted two years ago by the Japanese government to grow sufficient wheat for domestic purposes seems to be almost attained in the second year of the attempt.

Latest estimates of wool production for the five principal exporting countries (Australia, New Zealand, South Africa, Argentina, and Uruguay) for the 1933-34 season which has just ended (except in South America) point to a net decrease, greasy basis, of nearly 200 million pounds, or 9 per cent, in comparison with the 1932-33 season.

### Open Cans With Claws

Glacier Park Bears Enjoy Everything But Spinach

Glacier Park bears eat anything that comes in cans—anything except spinach, according to Dr. George R. Rulhe, chief naturalist.

"He found a ranger's cabin that had been broken into. Every can had been opened."

"The bears had eaten everything," he said, "except the spinach."

"To sceptics who doubted the bears' ability to open tin cans, Rulhe explained:

"They just run a claw through the tin and draw it around the edge—"

"Stick a job as you can opener will do."

A new radio typewriter has transmitted a weather map with tabulated weather data in 7 1/2 minutes, as compared with about 35 minutes required by the wire machines now in service.

## D.S.F. Mustard

## OCCASIONAL WIFE

By  
EDNA ROBB WEBSTER  
Author of "Joretta," "Lipstick Girl," Etc.

### SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, desiring to live their own lives apart. But Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so studying commercial art in the hope of finding an agency job. Others in the story are Avis Worthy, another wealthy girl who is trying to win Peter; Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. After a party at an exclusive club, when the rest of the members of the party go to a cabaret to continue the party, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Avis Worthy calls and persuades Peter to accept a loan of \$1,000. Peter finishes his exhibit and asks Avis and Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth" and Avis "Inspiration." Peter adopts the latter title and Camilla, heartless, goes to Peter's studio for quiet and to think. Peter and Avis follow each other and the lights are turned on, see the statue has been shattered to pieces. Avis accuses Camilla of doing this and Camilla, stunned by the disaster and hurt and horrified by the accusation, faints.

At Camilla's suggestion, Peter enters as his exhibit a statue he had sculptured especially for her as a wedding gift. They named it "Land of Hope."

Camilla's advertising campaign and Tiny Tots broadcast was a great success, and Mr. Hoyt expressed his pleasure and surprise on learning that Camilla was the author and artist who was so ably stimulating business for his company.

Peter's exhibit was awarded the Paris scholarship, and he prepares for his journey to France. After the ship's departure from New York, he is on his way to his cabin when he meets Avis Worthy.

(Now Go On With The Story)

## "Blue" Spells

Reduce some women to the peculiar shadow of their own smiling selves. Others take the Vegetable Compound when they feel the "blues" coming on. It steadies quivering nerves... helps to tone up the general health... gives them more pep... more charm.

### CHAPTER LVIII

It was in such a mood, when Peter had been exceptionally gentle and solicitous during the evening, that Avis ventured upon a long-dropped subject while they smoked and talked in a secluded corner of the deck together. He had not mentioned Camilla's name in her presence that day, and she risked the remark after referring to Camilla first in a casual manner.

"Poor little impulsive thing! I suppose it accounts for her genius. A girl like that never should fall in love. Her emotions are too violent, and jealousy is always her fatal undoing—like her breaking your statue. I'm sure you forgave her for that, after what happened."

He turned quickly to face her. "Why, Camilla never did that!"

"Oh—," she caught her breath suddenly, "then she didn't tell you, after all."

"Tell me what," sharply. "Why—! All about it. She came to me the next day and begged me to help her some way to make it up to you. I supposed she had told you, after the way you won the exhibit."

"You don't mean—that she deliberately destroyed it, and then—?" despatchly. Avis gestured hopelessly. "She wasn't really wholly to blame. Just saw red, or green, whatever jealousy makes you do, and did it in a sudden fit of revenge then instantly regretted it." Her voice was smooth, soft, convincingly sympathetic.

Peter was silent for awhile. Finally, he asked in a hollow voice, "But what did she come to you about?"

"Told me that she had persuaded you to enter the other group in the exhibit and begged me to try to influence Uncle John and the committee in your favor."

He sat forward suddenly with a groan. "Is that what I—?"

She shook her head with a slow smile. "On my honor—no, Peter, I went to see him, but his wife already was cast for you and I hadn't a thing to do with it. As for his influencing the committee, I knew that was impossible and never suggested such a thing. It would have hurt his pride to allow him to think that I would venture to persuade him. Fortunately, it turned out all right for you. It was obvious that Uncle John was not the only one who voted for your piece, but it happened that his vote was the deciding factor. You won by a single vote."

He smiled in silence again, and she was wise enough not to intrude then into those hurt, beset thoughts which she knew were struggling within him. After awhile, she reached over and touched his hand lightly.

"My dear, I shouldn't have mentioned it, but I have felt so sorry for Camilla all this time and I think

about it often. She must be very kindly in love with you to have done a thing like that."

"Mad enough," he exclaimed with vehement collocation, "but that can't be loved! How could anyone be cruel to the one you loved?"

She hesitated then. "I'm sure I couldn't, but there are all kinds of love, you know. Camilla is so emotional that she expresses everything she feels in action. But there is also deep, quiet, steadfast love."

"How do you know so much about it?" he asked colorfully.

She drew a quick breath, sighed. "Ah, that is another story that I—couldn't tell you, Peter."

"You have been—hurt, too?" gently.

"Not by love. But what is one to do when there is no love with which to be hurt?"

He hesitated a moment. "Then you are in love with some man who doesn't reciprocate?"

She nodded silently her head resting against the back of the chair and her half-open eyes watching him covertly.

"I'd say he was all kinds of a sap not to wake up and find himself," Peter declared forcefully, then sighed deeply. "Gosh, this love business is a wild, untamed thing, anyway. Why do people select their life partners by impulse and emotion instead of by practical reasoning as we venture into any other kind of business?"

"Because there is no getting away from love, I guess," peacefully.

"Well, what is it, then? How do we recognize it when we do find it? Why isn't it complete for us?"

"Why, Peter, you talk as if you never had been in love?"

"Why?" tersely.

"Because you would know the answers to all those questions."

Since then "Well, I don't." He could not escape from that strange, tingling sensation which Avis' revelation about Camilla had given him.

The thought that she, his precious Camilla, would so betray and humiliate him at the very climax of his ambitious efforts tortured him like the closing of a garrote around his neck. He might have doubted her guilt, had Avis not told him so simply and as if unaware that she was betraying the other's confidence in her. No, it was true enough; but the more he revolved the thing in his mind, the more confused and hurt and angry he became.

He brooded in silence for awhile, into which Avis did not intrude. Finally, he arose impatiently as if the inertia of sitting quietly was no longer to be endured. "Should you like to go in?" he asked tensely. "I'm not much of a companion this evening. This thing has got me—about Camilla. I hope you understand that I'm not—"

"Of course," she interrupted kindly. "I'm only so sorry that I mentioned it, Peter."

"I'm glad—might glad to know it," he contradicted. "More than anything else, I hate deceit. It helps a lot to know just how things stand."

"Well, don't you do anything rash like jumping overboard."

"Not on your life. I think I have discovered one more thing tonight—that love isn't worth all the suffering we take with it."

"Oh, Peter, dear don't be cynical," Avis pleaded.

"I'm not. Only being sensible."

She laughed softly. "You are much too romantic to renounce love. Get a hold of yourself, please. Good night, Peter."

He smiled down at her with a new tenderness. "Good night, little pet. She carried away with her the

light in his eyes, hugging it to her heart; remembered the vehemence of his renunciation of love. That would do for a beginning, she exulted. If she could take him along that far toward her goal within four days, what might she not accomplish in a year? By that time, she could make him wonder what he ever said that was attractive about Camilla. She would make herself indispensable to his life.

Camilla resolutely followed the routine of her days and thanked the benevolence of blessed, fatiguing, mind-occupying work. If two days could be so interminable and wretched as this how was she going to endure the year ahead of her? She tried to convince herself that, as time passed, she would become accustomed to Peter's absence and would be happier. But she did not want time and absence to dull her need of Peter. If so what then? She would have nothing left. Nothing for which to live and hope and work. Life then would be just a monotonous existence, without aim or reason or pleasure.

And what if Peter, immersed in his work, involved in his new life, discovered that his longing for her was dulled? Protest had with broken wings within her breast.

Resolutely, she put her thoughts aside and summoned her will to concentrate upon the fictional life of her characters. She was working at the office, but nowhere could she prevent her thoughts of Peter entering.

Her secretary announced a gentleman to see her. "He said it was urgent, but would not give his name," Miss Scott explained.

Camilla frowned with annoyance. "Probably another high-class beggar who got in with his air of importance. This radio publicity makes me a good target for such people. I'll see him for a minute."

(To Be Continued)

King Owns Rare Stamp  
In King George's stamp collection there is a five pound stamp which was prepared when the late King Edward came to the throne. The stamp was designed and engraved and some of the issue printed, but it was decided not to use it and the general public never saw the stamp.

"Look here, manager, two years ago I died here and couldn't pay my bill. You threw me into the street!"

"Indeed, sir? I'm very sorry, sir."

"Don't mention it. I'm afraid you'll have to do it again."

## Little Helps For This Week

"Study to show thyself approved unto God, a workman that needeth not to be ashamed." 2 Timothy 2:15.  
"And let us not be weary in well-doing: for in due season we shall reap if we faint not." Galatians 6:9.

The task Thy wisdom has assigned, Oh, let me cheerfully fulfill; In all my works Thy presence find, And prove Thine acceptable will.

—C. Wesley.

What is my next duty? What is the thing that lies nearest to me? That belongs to your every-day history. No one can answer that question but yourself. Your next duty is to determine just what your next duty is. There may be something you neglect, or something you know you ought to do. You would know your duty if you thought in earnest about it and were not ambitious of great things. If it is something commonplace that will make life dreary it will soon lead you to something more. Your duty will commence to comfort you at once, and will at length open the unknown fountain of life in your heart. —G. MacDonald.

## LOCAL & GENERAL

See "Woodie" for Coal.

Miss Jessie McCoy left this week for Edmonton and will attend the University of Alberta.

Teachers—Before purchasing your report cards see the sample at our office.—Didsbury Pioneer.

Mr. A. M. Anderson will make his next visit to Didsbury, Monday, October 1 at the Hotel. (39c)

Mr. and Mrs. Tom Allen and infant son, of Wetaskiwin, are visiting the former's parents.

E. G. Ranton was a business visitor to the southern city on Wednesday.

Work commenced this week on the raising of St. Anthony's Church, which is going to have a full-size basement.

Messrs George Hawkes and Ormond Phillipson will continue their studies at the University of Alberta and left this week for Edmonton.

Among local visitors to Calgary last Wednesday were Messrs. E. Gasser, M. Good, J. W. Halton and Ray Stouffer.

David Halton of Pincher Creek visited his brother J. W. Halton for a few days last week while en route for the University of Alberta.

Miss Connie Hoesgood left for Edmonton this week where she will continue her studies at the University.

The L.O.D.E. intend giving an art and antique exhibit on Oct 27. If you have anything of interest in antiques, art or handicraft you are invited to bring them in.

Mr. Jim Reid and son Charles, who have been renewing acquaintances here for the past couple of weeks, returned to their home at Vancouver on Sunday.

Mr. W. J. McCoy spent the week end with his family here. He reports that it will take another six weeks to finish his graveling contracts on the Drumheller highway.

Resuming activities after the holiday season, Knox United Ladies Aid will hold a Food Sale and Business Mens Supper in the Church Basement Sat. September 29th, from 5 to 7.30 p.m. (38c)

St. Cyprian's Anglican Church would welcome donations of fruits, grain and vegetables from members for the Harvest Festival Service on Sunday afternoon at 3 o'clock. All donations should be placed in the church on Saturday afternoon.

Come early September 28th to the Mill Warehouse and secure your supply of Mixed Fruit or Salt. If sufficient orders can be obtained we will ship in a carload of potatoes during October. Phone orders to W. J. Scheidt, R609.—Didsbury U.F.A. Co-op. Ltd. (38c)

The first C.G.I.T. meeting of the season, in connection with the Knox United Church, was held at the home of their leader, Mrs. Mitchell on Tuesday September 25, at 4.15 p.m. The following officers were elected: President, Rita Scrutton; Vice President, Winnie Adshead; Secretary, Betty Boorman; Treasurer, Betty Cummins.

The three prairie wheat pools will co-operate in presenting a series of 13 radio talks during the fall months the first to be given October 3, when Louis Brouillette, president of the Saskatchewan Wheat Pool, will be the speaker. These talks will be given on Wednesday evenings from 8.15 to 8.30 Mountain Time, the Alberta stations being CJCA (Edmonton Journal), and CFCA (Voice of the Prairie, Calgary)

Mr. and Mrs. J. V. Berscht, Leonard and Joan returned from a motor trip to Ontario. Mr. Berscht states that conditions in the east are fair and that the soft-fruit crop, especially peaches and grapes, was very good. The apple crop, however, will be short owing to frost in the early part of the season. The grain crop was good in the greater part of Ontario. The party took in the Worlds Fair at Chicago and the Canadian National Exhibition at Toronto. The only thing J.V. regrets is that he couldn't take in the World series.
